

# **WORKING LANDSCAPES: The Environmental Benefits of Grazing Seminar**

**A seminar about the benefits of grazing and the environmental values derived from ranching.**

**Learn from professionals how livestock grazing benefits Threatened & Endangered Species, reduces fuel load and invasive weeds and is an integral part of ecosystem restoration.**

**Hear about the importance of forming partnerships between ranchers, environmental groups, and agencies to promote the sustainability of livestock grazing and the preservation of open space.**

**Speakers include Dan Dagget, environmentalist and author of two books, “Beyond the Rangeland Conflict” and “Gardeners of Eden”**
